

MAP OF MAIN
CORRIDOR
RENOVATION
PHASE 1

Phase 1 renovation of The Medical Center main corridor to begin Dec. 1

Beginning Thursday, December 1, the first floor main corridor of The Medical Center will get a face lift. Cosmetic updates such as new flooring, rails and paint as well as modernization of public bathrooms will be included in the renovation.

Renovation will be divided in three phases to minimize inconvenience and to ensure that alternate access routes are available throughout the project. Completion of the project is expected in early May.

The first phase begins December 1 and will last until approximately January 11. Alternate routes using back hallways will be utilized during this time to bypass renovation areas.

The first phase will include the following areas:

Outpatient lobby and registration

During this first phase, patients and visitors coming to Outpatient will be impacted most. All registration normally completed in Outpatient will be moved to Diagnostic Imaging Registration. Patients and visitors should be instructed to use the Diagnostic Imaging entrance located on the High Street side of the campus. The employee parking lot behind ER parking temporarily will be designated for patients and visitors. Employees will need to park in other employee parking lots. The lower section of the D Tower parking lot at the corner of 2nd Avenue and High Street will be open to employee parking during this phase.

Registrations normally completed in Outpatient include:

- Inpatient Registration
- Endoscopy
- Lab
- Cardiac Catheterization and Electrophysiology Labs
- Private Referral

- Cardiopulmonary Rehab
- Wound Management
- Lactation Consultations

Section between the Diagnostic Imaging hallway and Respiratory Care

To bypass this section, back hallways through Diagnostic Imaging will be used.

Area in front of Elevators 4 & 5

The elevators will be accessible from the back side. To access the elevators and the alternate route around the renovation area, a pass-through will be open in the Critical Care Waiting area. Therefore, visitors will not be able to utilize that area for waiting.

Side entrance by Administration

Entrance to The Medical Center from the physician parking lot by Administration will be closed. The renovation area will extend just past the Nursing Administration hallway. Patients and visitors will need to enter through the main entrance of the hospital on Park Street. Access to Administration will be through Classroom 2.

What you can do

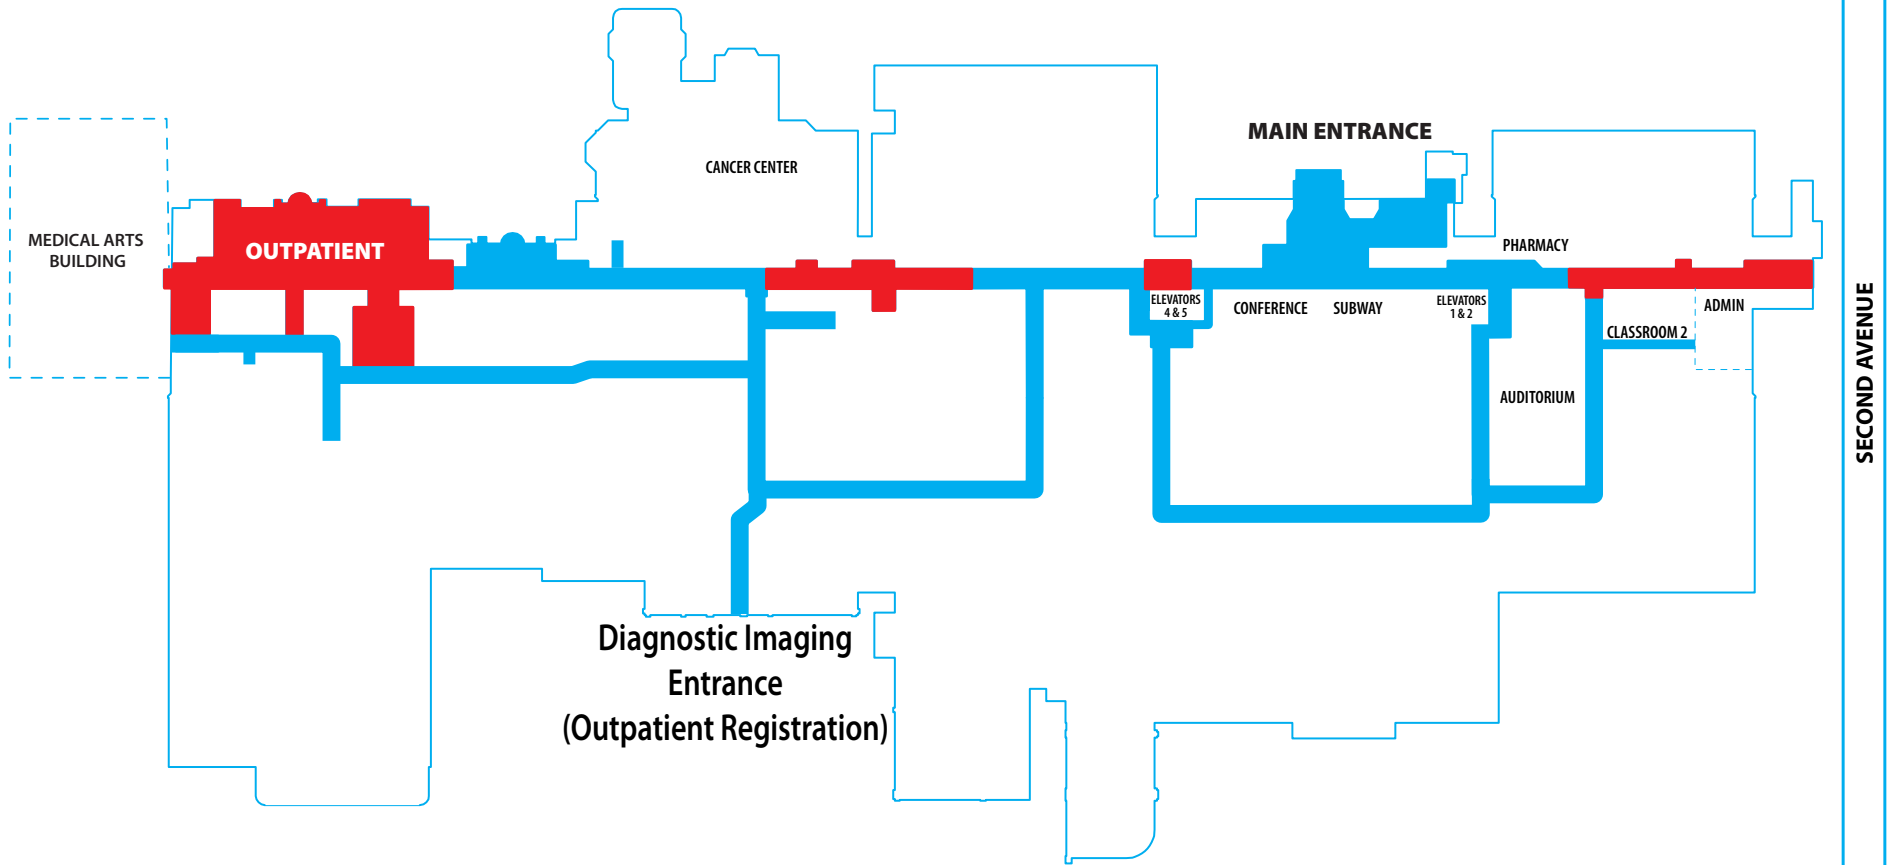

A renovation of this magnitude and scope will obviously affect the patient and visitor experience in our hospital. We want to minimize the inconvenience and confusion for our patients and visitors. Signage will be posted to help direct individuals on alternate routes. Please assist patients and visitors in finding their way as you encounter them in our hallways.

Commonwealth Health Corporation's mission is to care for people and improve the quality of life in the communities we serve.
